Twin-ram balers
Standard-duty series
Heavy-duty series

Scrap metal balers
Oil filter balers
Conveyors
Slider-bed
Chain-belt

Fluffers
Cart dumpers
Self-contained compactors
Stationary compactors

Design assistance with waste
and recycling flow, site fit, etc.

JF66 2-Ram Baler

(Illustrated with optional operator platform station, conveyor head support, and user-supplied wire spool)

Model JF66...an affordable way to achieve...

Large baler performance in a scaled-down size and price

Multi-purpose, no-fluffer baling of

- papers
- plastics
- non-ferrous metals

Manual or automatic baling

Includes Automatic bale tying system

Large 40" x 60" feed opening plus hopper to fit site & material requirements

Design and construction by people with over 25 years experience in 2-ram balers

PLC controls with fault indicators, help screens, and user setting adjustments

12-month/2,000 hour factory warranty on parts and labor

Performance and Durability in an economical package

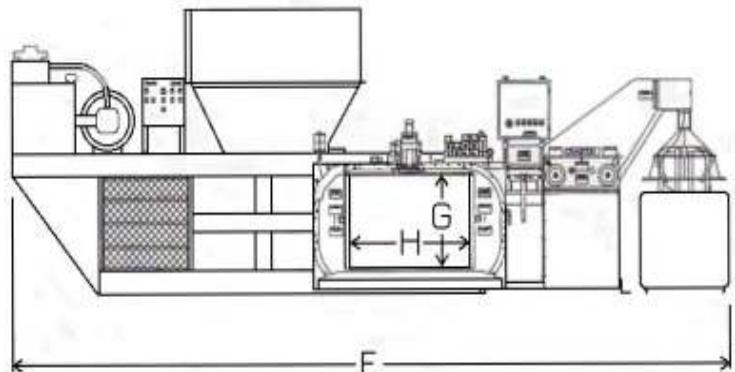

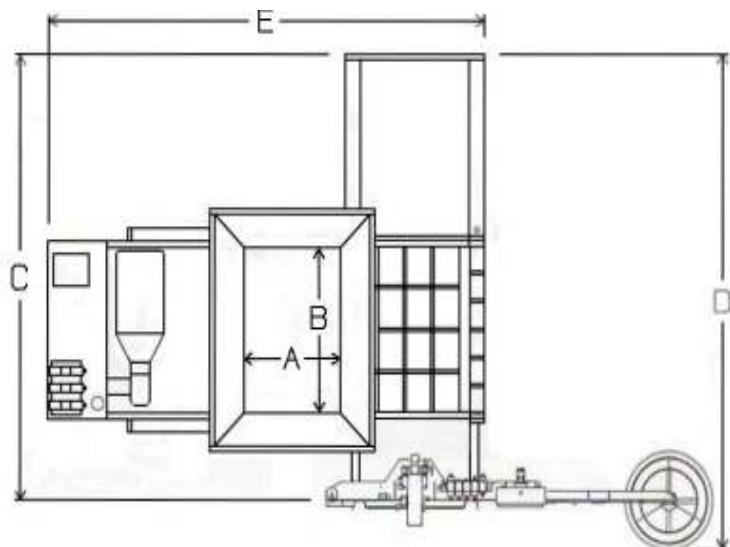

*Engineered for Peak
Performance*

JF66 FEATURES

- Engineered for maximum production per \$
- Over 30" bale chamber penetration yields superior bales
- Bale aspect ratio allows production of dense, stackable bales of newspaper, office paper, computer print-out w/o shredding
- Progressive punch-and-tear shear system is adjustable, replaceable, flippable for long life and protection of baler floor
- Clean-flow hydraulic system increases efficiency, reduces noise & HP requirements
- Thermostatically-controlled oil-to-air cooling system protects hydraulic fluid & allows continuous-duty baling
- Economical 20HP 480V 60Hz 3Ø power unit (other voltages available)
- Chassis includes replaceable steel wear-liners to ensure long life
- Slatted floor and platen bottom maintains straight running, protects sides
- Off-chassis control station includes PLC and operator interface with fault messages, help screens, user-adjustments
- Optional telephone modem allows factory diagnosis, monitoring, adjustment
- Electrical and hydraulic components to international industry standards—no factory-special parts
- Honey-combed construction at key stress points for long-term structural integrity
- Platen penetration staging allows monitoring of baling progress
- Available left- or right-hand
- Standard electric-eye actuation for more automated baling
- Variety of feed hoppers available to match site and material situations
- Automatic wire strapper installed, interface with baler controls, tested
- Familiar bale size (30" x 45" x 60")
- Top feed opening 60"W x 40"L plus hopper to suit convenient loading
- Customization? Just ask!

LAYOUT & DIMENSIONS

A	top load length (+ hopper)	40"
B	top load width (+ hopper)	60"
C	chassis width	163"
D	chassis width with tier & wire stand	180" (15')
E	chassis length	181"
F	chassis length with tier & wire stand	273" (22'9")
G	bale height	30"
H	bale length (chambered)	45"

TYPICAL BALES ⁽¹⁾

	weight	lb/ft ³
Corrugated cardboard	1200	25
Old newspaper	1500	32
Computer print-out	1500	32
Used beverage cans	5-600	10-12
PETE/HDPE plastic bottles/jugs	5-600	10-12

(1) actual bale weights will depend on factors such as moisture content, material and feeding conditions, etc.
